

## Guidance on Photographs

Sometimes photographs of your feet, ankles and standing foot posture can help support your assessment in the foot and ankle clinic, so you may be asked to email these to us prior to your consultation.

Although photographs can be extremely useful, we understand that sometimes taking the photographs may not be possible. If you cannot provide some or all of the photographs please let the administrative team know.

Please take these photographs in daytime hours to ensure good light. Ensure you are bare foot and preferably standing. You may also want to roll your trousers up or wear shorts to ensure we can see the feet and ankles clearly.

Use the camera to take pictures of your foot to include: The front, the back, the top, the sides and the underside.

Please email your photographs to:

[Here.Brighton.smskp@nhs.net](mailto:Here.Brighton.smskp@nhs.net)

Please include in your email;

1. Your full name
2. Date of birth
3. Contact telephone number

*We will only use these images for the purpose of treating you. They will be uploaded to your medical record once they have been received by our admin team so that only authorised personal will be able to view them. They will not be shared with anyone outside of the purpose of offering you consistent care.*
